077 Name: **Oregon Lakes** Cause: **Human**

The IMT continued to implement its strategy to confine the fire south of the primary control line by conducting firing operations in order to reinforce the line by removing the available fine fuels in the path of the fire should it spread to the north. Last night, crews conducted firing operations on primary containment line west from H-30 to H-40. The IHC ordered yesterday was shuttled to the fire today. Construction of a dozer line to the northwest from H-40 started and crews prepared for future firing operations on this line. While this line was created and prepped, tankers and helicopter with buckets checked fire spread and pre-treated areas of concern for future firing operations. Additionally, crews also prepared to resume firing operations east of the slopover on the primary containment line this evening.

Crew: Chena IHC	Type: T1	Assigned: 05/12
Crew: Midnight Sun IHC	Type: T1	Assigned: 05/12
Crew: Pioneer Peak IHC	Type: T1	Assigned: 05/15
Crew: White Mountain	Type: T2 IA	Assigned: 05/07

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
