077 Name: **Oregon Lakes** Cause: **Human**

Today, crews on the east side of the primary containment line continued mop-up of the original slopover and continued securing sections of line where firing operations have been recently conducted the past few days. Additionally, the remaining section of primary containment line extending east to the Delta River were assessed for future firing operations.

To the west, crews continued to secure firing operation lines and also finished firing operations between H-50 and H-60 in an area where a brief rain shower delayed firing yesterday. The military observation post area was assessed for future point protection needs, and options for indirect lines connecting natural features were scouted.
