Crews reinforced and secured previous firing operation lines in both the east and the west and continue mop-up of the slopover. The military observation post area at the western end of the primary containment line was prepared for potential point protection and indirect firing operations from H-60 to the east using natural features where possible. The section of unsecured shear blade line near the Delta River was prepared for future indirect firing operations. The IMT began preparations for a transfer of command to another Type 2 IMT on 5/21/19.
