The fire was reported by Bethel flight service as a fire northeast of Bethel approximately 20 miles. 222ME flew the fire and sized it up as 100 percent active, 80 acres, smoldering and creeping in tundra. J-12 was launched out of McGrath and deployed 6 people to the fire at 2310. Fire personnel once on the ground reported that the tundra was proving hard to control, and that it was growing slightly. The left flank is contained by water, but the interior and upper right flanks were holding heat. Plans for tomorrow consist of personnel making their way around the fire, accessing and establishing a plan for 100 percent suppression.

The fire received no precipitation overnight, and personnel's primary objective for the day was to grid 10 foot in from the perimeter. An IA squad from fire 230, and an IA squad from fire 236 were mobilized to the fire to assist with suppression efforts. Six jumpers were demobilized, and 2 jumpers were left in place filling critical overhead positions. At 2143, the IC reported that the perimeter is holding but that the interior was still exhibiting a lot of heat. The head of the fire had some torching fire behavior, and due to the fire burning deep, the tentative plan is to keep personnel on the fire approximately 6 more shifts.
