**904245** Owner: **ANCSA** Unit: **AKVLN-Kokarmiut Corporation**  
**245** Name: **Kisarlik River** Cause: **Lightning**

The fire was contained at 2000 today and demobilization is planned for 6/17. Personnel identified fewer than 20 smokes, and will continue to work the interior of the fire.

Daily Report From: 06/15

0.0 Acreage Change Since 06/14

Lat: **63:12:11.0** Status: S/C Acres: **24.0** Option: **Modified**  
**MAR0** Lon: **154:26:10.0** Personnel: **20** Start Date: **06/13** Area: **SWS**  
**904243** Owner: **State** Unit: **AKAKS-Alaska-Other**  
**243** Name: **Scow Harry Creek** Cause: **Lightning**

The fire received light precipitation through the night and into the morning. Fire personnel worked the fingers off the south side of the fire that were still exhibiting significant heat. A transfer of command took place at 1600, and the 8 jumpers were demobilized off the fire. White Mountain crew mopped up 90% of the visible heat and completed a green grid around the fire, no heat was found. The plan for tomorrow and Monday is to complete gridding the fire. Fire personnel will then pull the pumps and build sling loads to prepare for extraction and demobilization on the morning of the 18th.

An afternoon reconnaissance flight indicated that much of the perimeter looked secure. Two hotspots were found that will require portable pumps to cool them off and secure the area. The Midnight Sun crew is working on cleaning up the burnout operation they successfully completed yesterday. There are at least three more shifts of work to completely secure that part of the line. It will include quite a bit of saw work in the timber. The 8 smokejumpers will tentatively be demobilizing on Monday.

Fire received light precipitation throughout the day, resulting in minimal growth. Crews continue to secure primary indirect line on the west side of the fire. Point protection was established on previously identified values at risk. Plans for tomorrow's shift include looking for opportunities to extend the line to the north, and securing the finger on the southern edge of the fire.

N864SF flew the fire at 2000 and reported that it was 75% active. There was group torching in some areas and continuous crowning in others. The flame lengths observed were from one to thirty feet. The rate of spread was one chain per hour. It's burning most actively towards the west, and backing towards the east, south, and north.

The fire was flown and mapped today. The fire was actively burning on the west, southwest, and the northeast section. The fire behavior was rank 3 and pockets of rank 4. Group torching, short runs and smoldering was observed in the black spruce and tundra. On the northeast section of the fire across the Canadian border it has burned past a fuel staging area with no damage to the area. Area FMO has been in contact with the Canadian fire officials. Canadian helitack are anticipated to respond tomorrow to implement point protection measures on their side of the fire.
