Fire continued to smolder and creep with some isolated torching. IC utilized Fire Bosses, a tanker, and bucket ships to secure fire edge. Tanana Chiefs were shuttled to fire line by helicopter. Fire is expected to continue to creep but will remain East of Little Chena, North of old dozer line, and West of structures identified on the East side. Fire is 10% contained at this time.

Strong southeast winds this afternoon increased fire behavior. Gusty afternoon winds and patchy sunshine is helping dry out fuels. Fire spread was mainly wind driven and moving to northwest where black spruce and winds aligned. The marshy area north of the fire is currently checking fire spread to the north and is a viable barrier as the fire spreads to the east. Minimal fire activity continues to be observed in hardwood fuels.

A Type 1 handcrew will continue to reinforce and defend primary indirect line on the west of the fire. Agency Type 2 crews will be inserted on the southern portion of the fire, working to secure the southern most finger. Crews will continue firing operations, if needed, to defend indirect lines. Type 1 helicopters will support efforts to secure the southern and western edge of the fire. Provide point protection for any threatened values at risk. Continue dissemination of fire information with stakeholders and public. Plans to transfer command on 6/18 to the Alaska Type2 IMT Black Team at 0700
