The fire is 70% contained as of 06/24. Fire fighters continuing mop-up of interior heat. Relief crew arrived on the fire today.

Daily Report From: 06/25 **0.0 Acreage Change Since 06/24**
MBS4 Lat: **64:59:13.0** Status: S/U Acres: **908.0** Option: **Full**
911319 Lon: **148:24:55.0** Personnel: **237** Start Date: **06/21** Area: **FAS**
PNMBS4 Owner: **State** Unit: **AKAKS-Alaska-Other**
319 Name: **Shovel Creek** Cause: **Lightning**

Crews continued with direct attack suppression operations on the fire perimeter in both divisions. The west side of the fire backed towards Shovel Creek and is holding on the creek. The east side of the fire is generally holding on the ridge, but had some spotting caused by islands of fuel burning inside previous retardant lines. Work was continuing on these spots at the time of this report. Existing trails on the ridge line combined with hose lay are being used to hold the fire on the east flank. Tactical aircraft were again used to check fire behavior while crews continue to contain the fire. Areas were identified to begin creating a dozer line east of the fire's current location which will be used as an Alternate Containment Line.

Point protection preparations were completed on the structures most immediately threatened to the north of the fire on the south side of the Chatanika River. Structure assessments continued in other areas along the Chatanika River to the north and west of the fire. The five residential subdivisions south and east of the fire were assessed for point protection should the fire threaten those areas.

Crews worked to increase mop-up depth on southwest perimeter, and prepped for burnout further south. Crews initiated a burnout operation on the north side of the Sterling Highway corridor, bringing fire west from about Milepost 62 to near Milepost 67. Multiple aviation assets assisted with aerial firing or water delivery. Fire grew to the south and southeast, under generally northwest winds. Night shift and swing shifts are in place.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
