355 Name: **Eagle** Cause: **Lightning**

Firefighters continue to make good progress towards perimeter containment through mopup operations despite some challenging conditions. Very steep slopes and numerous snags falling near and across established containment lines are cause for concern. Smoke is settling in the river valley causing some reduced visibility for aviation resources. Anticipated incident containment date is now July 5th with no additional resources requested.

319 Name: **Shovel Creek** Cause: **Lightning**

Very active fire behavior experienced overnight moderated today with the arrival of a wet frontal passage. Due to very active fire behavior and large fire growth to the east last night past containment lines, the IMT adopted an indirect attack strategy along the primary containment line. Crews continued to hold, improve, and mop-up the section of primary line west of Murphy Dome tied into the Hardluck Fire scar. East of Murphy Dome, resources improved and prepared the primary containment line that extends east 8 miles to the Perfect Perch subdivision and then turns north for 4 miles to the McCloud subdivision. The majority of these portions of primary containment line consist of existing roads and established fire breaks which will only need minimal improvements. North of the McCloud subdivision, plans were made to use dozers to establish an indirect line to tie the primary containment line into the Chatanika River. In the residential subdivisions located to the south and east of Murphy Dome, point protection work continued in the residential areas immediately threatened by the fire. Point protection work also continued along the Chatanika River north of the fire. A type 1 IMT has been ordered.

PNMA3V Owner: **State** Unit: **AKAKS-Alaska-Other**
255 Name: **Caribou Creek** Cause: **Lightning**

Moderate precipitation occurred over the fire area today and diminished chances of spotting due to interior flare ups. There are currently 155 personnel assigned to the fire and various support functions. Crews continued to work the perimeter of the fire and there is a roughly 300 ft saw line cut around the entire fire in the dense and high-risk areas. Progress was great and one type 1 crew was sent to a separate fire. crews will continue to secure perimeter with end goal of 300 feet of cold black. Crews and overhead will continue to time out and an official transfer of command from one IC3 to another will occur in the morning. Tomorrow will be a transition day with additional crews timing out. Aircraft logistical support was limited due to weather and some aircraft were lent to support the Nugget Fire.

181 Name: **Swan Lake** Cause: **Lightning**

Containment lines were tested today under continuing hot and dry conditions, especially where re-burn is occurring in the 2017 East Fork fire scar. Aerial resources worked to keep fire from crossing west of Mystery Creek on the fires northern perimeter. Crews continue to mop-up, securing the edge of the established line, north of the Homer Electric transmission line. Crews along the East Fork Moose River continue to burnout remaining green pockets, and are mopping-up the remainder of the area. Remote sites to the north and northwest have personnel and strengthened structure protection in place. Night shift continues to patrol the Sterling Highway and monitor smoke conditions overnight.

The fire utilized Lead Plane B-6, Fire Bosses 208, 209, 212 and Tankers 42 and 52 loaded with BlazeTamer to help suppress fire activity. Smokejumpers completed the cabin protection and left sprinkler kits in position for point protection. The SMJ's were demobed successfully and all necessary gear was retrieved by Helicopter 230. Lead Plane B-6 updated acreage at approximately 50 acres and there is a plan to accurately map the fire at the earliest opportunity.
