Fire was only moderately active today with backing and creeping on multiple flanks. Aerial reconnaissance estimates fire is just over four miles away from nearest allotment. Structure preparation and sprinkler systems were established at a Fish Camp in the area. Water levels in local waterways have been fluctuating and may be of concern for transportation needs. Burnout operations are planned and crews are waiting for more favorable conditions to implement. A crew was transported from this incident to another incident accounting for the reduction in personnel.

Crews patrolled the section of primary line west of Murphy Dome tied into the Hardluck Fire scar. East of Murphy Dome, resources improved and prepared the primary containment line with dozers and hose lays. This extends east 8 miles to the Perfect Perch subdivision and then turns north for 4 miles to the McCloud subdivision. The majority of this portion of the primary containment line consists of existing roads and established fire breaks which will only need minimal improvements. North of the McCloud subdivision, dozers and hotshot crews continued establishing an indirect line to tie the primary containment line into the Chatanika River. Dozers and crews made preparations for firing operation along alternate containment lines when the fuel and weather conditions allow. In the residential subdivisions located to the south and east of Murphy Dome, point protection work finished in most of residential areas immediately threatened by the fire. Point protection work also continued on remote properties along the Chatanika River north of the fire and crews there also continued direct attack on the northwest flank of the fire.

A report of a lightning fire was called into Ketchikan Dispatch late afternoon on 6/30. The lat/long given plotted to a remote area on TNF land in Modified protection. After notifying the Duty Officer and appropriate management officials, a decision was made to fly the fire on Monday to get a good size up. This lightning fire is burning intermittently in steep, inaccessible terrain with low spread potential and has been placed in confine/contain strategy using natural barriers. It is in a remote area and will be monitored from the air until called out.
