PNMD2N Owner: **BIA** Unit: **AKAKA-Native Allotments**
447 Name: **Tunravik Creek** Cause: **Undetermined**

The fire was relayed to McGrath dispatch via Alaska State Troopers and reported to be two miles north of the village of New Stuyahok. J-63 responded and found a 1.5 acre fire, 50% active with winds 15-18 out of the south burning in tundra. The fire posed a threat to the village if a wind shift were to occur. Eight smoke jumpers were deployed, and reported the fire was burning deep into the peat moss. Jumpers worked the fire with the assistance of locals hauling water to the by 4-wheeler.

446 Name: **Lake Otis** Cause: **Human**

The fire was reported to the Anchorage Fire Department as a creeping 50' by 100' grass fire. Due to the close proximity to fire 423 (M.L.K.), ten Forestry personnel also responded with AFD. Initial suppression efforts were successful and command of the fire was turned over to AFD. All Forestry personnel have returned to fire 423.

Fire behavior included smoldering, creeping and isolated torching. On Division A, personnel worked 10 - 15 feet in from the Division break to the slough and 10 feet in from the slough to the Division break on the eastern perimeter. Personnel are making good progress due to the shallow duff layer. Rainier T2IA crew arrived. A level 1 - "Get Ready" evacuation order is in place for residences in the vicinity. The roads are not currently closed, however, closing the area to local residents only is being discussed.

Fire Behavior: Moderate

-Single tree torching
 -short range spotting
 -backing.

The warming and drying trend persisted this operational period, fire behavior was moderate.

12 hour-Crews will remain engaged in direct attack strategies simultaneously with point protection strategies on values at risk in the direction of fire spread, including allotments north of the fire and Northway.

Evaluations for infrastructure, primary residences and other structures will be on going in the AK Hwy 2 corridor.

Daily Report From: 07/06

351 Name: **Page Mountain** Cause: **Lightning**

The fire was flown by detection and mapping personnel in the early afternoon and again in the evening. The fire was 90% active with smoldering, creeping, backing, spotting and single and group tree torching observed. The fire is spreading to the south and west with winds out of the North, 8-15 mph. The fire has run into an old fire scar on the northeast perimeter causing it to die down significantly. The head of the fire progressed approximately 1.5 miles since the morning observation but has slowed down in a swampy area to the south. The western perimeter is burning at a rank 3 with isolated single tree torching. One spot fire was detected across a creek in modified protection. Helitack from McGrath began structure protection this morning on two additional cabin sites and will continue to assess values in the area.

PNMB4R Owner: **State** Unit: **AKAKS-Alaska-Other**
323 Name: **Nugget Creek** Cause: **Lightning**

Due to high temperatures and lower Rh's, the fire behavior increased in the afternoon on the eastern portion closest to the road, and later in the evening there were three well established columns coming off the fire. Helicopter 120SH launched from Fairbanks Area at 1325 to activate the pre-prepped cabin structure protection on the cabin that was a little over a quarter of a mile away, south of the fire. Plans still consist of monitoring the road system to ensure the fire stays on the south side of the Chena River, and to watch for any spot fires that may occur due to extreme fire behavior.

PNMBS4 Owner: **State** Unit: **AKAKS-Alaska-Other**
319 Name: **Shovel Creek** Cause: **Lightning**

Hotter and drier conditions with minimal cloud cover contributed to increased fire behavior today. Fire continued to be active on the eastern edge. The burn from the previous day continued to back down into Murphy Creek. In the Firing Group ignitions will continue tomorrow as conditions allow, while additional resources will work to mop up and secure the previous firing operation. In other areas of the fire, resources will continue structure protection preparations and working sections of line securing fire perimeter along the east and north along the Chatanika River corridor.

181 Name: **Swan Lake** Cause: **Lightning**

Fire behavior was more moderate than yesterday with much less growth than the previous day. Existing containment lines in Division A, R, and K held throughout the operational shift. Heavy aviation efforts continue to hold the fire in Division L in place. Crews are constructing daylight break along the Skyline Trail. Lines along the Fuller Lake Trail and above the highway at MP 60 are being assessed as contingency lines, using the trail and natural features to prevent spread to the east towards Cooper Landing. Crews are prepping power line easement between MP 59-55 to prevent the fires spread to the Sterling Highway. Crews continue to look for options for direct attack or burnout opportunities to check the fire spread to the east. Fire behavior continues to be active as anticipated due to hot and dry conditions. Fire progression and spread to the north and east was assessed and long term strategic objectives have been developed in the event eastwardly progression continues to accelerate. Crews continue to mop-up, securing the edge of the established line, north of the Homer Electric transmission line. Crews along the East Fork Moose River continue mopping-up and increasing perimeter security in the remainder of the area. Remote sites to the north and northwest have firefighting personnel and strengthened structure protection in place. Access and site protection are being assessed for the E and W as requested by local unit. Night shift is patrolling the Sterling Highway and monitoring smoke conditions, due to increased fire activity in Division P and L. Alaska State Troopers are monitoring and delaying traffic due to heavy smoke on the Sterling Highway.

Fire experienced significant growth to the south and east. Air attack, fire bosses, and a helicopter responded to the area of the Silver repeater to perform water drops. Fire was reported to have burned all around the repeater and water drops were effective at suppressing fire under the repeater. Helitack personnel were not able to engage due to the level of fire activity. At the time of this report the repeater was fully functional.

Forestry personnel finished tying in around structure. The fire was flown early afternoon by 222ME who reported it to be 70% active, rank 3, creeping, backing, with winds 8-10 out of the NE. The fire had jumped the Dishna in several locations but was holding in an oxbow. The fire was flown again at 2227, it was putting up a big column but observers were unable to get a clear picture due to heavy smoke.

250 Name: **Sunshine Mountains** Cause: **Lightning**

The fire was flown by detection and mapping personnel and reported as 15% active with 10-15-foot flame lengths, smoldering, creeping, and group torching were observed. A 20 acre area of the was active and spreading to the southeast with light winds. The fire was flown again at 2050, it was burning at a rank 5, running, torching, and crowning. The head of the fire was approx. 2000 acres, 80 to 100-foot flames, spreading 30-50 chains per hour. Fuels are continuous black spruce for 3 -4 miles until it gets into some swampier terrain. The fire was spotting ¼ to ½ mile ahead and bumping up against an old burn scar on the west. At 2135 the fire head had slip into two, each making their own run. Phenomenal fire behavior was observed.
