485 Name: **Grouse Creek** Cause: **Lightning**

Originally reported by a resident of Rampart. Bravo-63 was dispatched to conduct reconnaissance in the area. The aircraft discovered 2 fires in the immediate area of the report: 485 and 486. Fire was originally reported as 5 acres, with a moderate spread potential. Due to potential values at risk, one load of smokejumpers was ordered. Upon arrival on scene, J-52 reported the fire had grown to 150 acres, with 90% of the perimeter actively burning. J-52 deployed 8 smokejumpers to begin protection of structures in the area. No values are immediately at risk, and structure protection preparations will continue through the night.

Active thunderstorms passed to the north of incident 367 this morning but no precipitation was received on the fire. Personnel are dispersed amongst multiple allotments and structures around the area of incidents 367 and 407 preparing for structure protection and potential future burnout operations. Some resources from incident 407 were relocated to Chalkyitsik to assess protection needs there and begin to make preparations. A type 2 IMT has been ordered for a group of four incidents in the area and will be known as the Chalkyitsik Complex.

The fire transitioned from jumpers to the Klamath crew today. Visibility prevented crew shuttle by air, so crew shuttle will be completed tomorrow with 1 more boat load coming in. Jumpers were released, and are expected to be back in Fairbanks tonight. Fire stayed within containment lines, but was active, with occasional flare-ups. The helispot was completed, and is ready for inspection. The crew started cutting on the right flank, jumpers continued watering the hot areas and reinforcing the edge. There is a lot of saw work remaining, and the IC predicts at least 3 days for the crew.

362 Name: **Boundary River** Cause: **Lightning**

Fire burned into all fuel types under moderate burning conditions. Moderate conditions gave way to Red Flag conditions till 2200hrs this operational period. Starting in the early afternoon, fire behavior and spread increased and burned actively in spruce and tundra. Ground conditions following burnout operations from the previous operational period will be monitored and additional burnout operations to defend control lines will be implemented as needed.

Crews will continue to remain engaged in direct attack strategies simultaneously with point protection strategies on values at risk in the direction of fire spread, including allotments north of the fire and Northway. Structure protection actions in and around allotments north of the fire and Northway to continue. Evaluations for infrastructure, primary residences and other structures will be ongoing in the Alaska-Canada Highway corridor.

349 Name: **Chandalar River** Cause: **Lightning**

The fire received a brief heavy shower from a passing thunderstorm around 1000. Clouds remained over the fire for most of the day keeping fire behavior to a minimum. Clouds lifted in the afternoon, fuels began to dry out, and by late afternoon the fire became active again. Midnight Sun IHC and eight smokejumpers demobilized and Modoc crew arrived on the incident. A fireline medic also arrived. Fuels remained wet enough that burnout operations were not initiated today with plans to burnout as soon as conditions are favorable.

337 Name: **Hadweenziec River** Cause: **Lightning**

The fire continues to actively spread to both the east and the west towards allotments and structures in both directions. Fire spread to the south has been largely slowed or stopped by natural barriers and is unlikely to grow in the absence of strong winds. Preparations are being improved around camps and assessments of allotments further away from the fire are being conducted. Personnel were able to fly the fire today to help assess the fire and locate structures. A severe thunderstorm with medium-sized hail was reported in the fire area late in the afternoon, however, no precipitation was received on the fire.

324 Name: **Hess Creek** Cause: **Lightning**

Fire spread continues to directly threaten highways, mining camps and other structures in and around Livengood. The fire is producing heavy smoke causing reduced visibility along Hwy 2. The incident is working with AKDOT to coordinate traffic signs and notices in the area. Some small scale burnouts were initiated around structures and sprinkler systems were activated to minimize direct impacts to the structures. Increasing numbers of public are interacting with fire personnel and the incident PIO reports an increase in local and national media presence in the fire area.

PNL92Q Owner: **USFWS** Unit: **AKKNR-Kenai National Wildlife Refuge**
181 Name: **Swan Lake** Cause: **Lightning**

Fire behavior continues to be driven by above normal seasonal conditions. Minimal fire spread was observed on the fire perimeter with very limited interior smoldering. Winds have shifted to the southwest, mixing substantial smoke out of the fire area. Fire progression and spread have been assessed in areas of concern, and long term strategic objectives continue to be evaluated and developed. Suppression resources are in place in the event eastwardly progression continues. Containment lines in Division A, R, and K were untested during the burn period. Aviation efforts are highly effective and continue to slow fire spread at critical points in Division L and P. Improvement of the Skyline Trail as a potential confinement point in Division L continues through actions by crews. Fuller Lake, Resurrection Pass, and other trails north and above the Sterling highway at MP 60 are being implemented as containment and contingency lines. Structure assessments continue, with Kenai Peninsula Borough evacuation plans in place. Contingency lines are being implemented to halt fire spread towards Cooper Landing and beyond. Crews are utilizing existing trail and natural features establishing control lines to check eastward fire spread into Cooper Landing. Crews continue to secure established line and fell hazard trees threatening the Homer Electric transmission line. Along the East Fork Moose River, crews continue mop-up and increasing perimeter security in the remainder of the area. Sites to the north and northwest have firefighting personnel and structure protection efforts are in place. Remote structures are prepped and have sprinklers in place. Future point protection efforts are being assessed for the East and West Swan Lake Cabins in the Chugach National Forest. Initial attack efforts are supported as requested by local unit.
