**466** Name: **Chalkyitsik Complex** Cause:

Fire behavior and growth was minimal today due to an encroaching weather system. This brought in a more moist air mass, raising the minimum relative humidity to 48-70% in the complex area.

It was a busy day operationally, mopping up in the Structure Group, assessing the slopover north of Chalalie Lake, assessing Native Allotments and structure sites along the Draanjik and Lower Black Rivers, evaluating fire impacts to sites on fire #348, and inserting hand crews into fire #367 cabin sites B3 and B4 to begin mop-up where the fire had burned around plumbed sites. A new radio repeater was installed for use beginning Sunday.

Fire #687 Small Timber Lake came under operational control of the IMT and has been added to the Complex. A hoselay has been installed and mop-up begun. Estimated containment on 7/29.

Total complex acres are now 496,273.

Containment lines in divisions A, K, L and R continue to hold. Suppression supplies are being removed from the line and repair efforts are making good progress. Resources are being demobilized and reassigned. The Incident Management Team has been downsized to a short team configuration, with expected transfer back to local administration on July 31.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
