An inversion set in overnight causing a delayed response for aerial resources. Smoke jumpers conducted unmanned aircraft operations to scout for a helispot and staging area. As the inversion lifted and visibility became better, A/A responded. 120SH conducted a shuttle mission of the Redding IHC, while 99675 conducted bucket drops. A/A requested fire bosses 241/243 and air tankers to respond. The inversion and rough weather then further delayed aerial resource activity. The fire was estimated at 700 acres at 1826 with structures immediately threatened. Air tankers with lead plane were ordered to conduct multiple retardant drops. The combination of retardant, dozer, and jumper operations were able to slow the head of the fire.

Fire personnel worked the fire into the night to hold and secure a sloop over and get a hose lay around the sloop. Caravan 9602F assisted in a recon of the fire in the afternoon, reporting it to have grown to approximately 5000 acres. Dozer work continues on the hot berms and equipment was hired to continue to assist in efforts to protect the community. Personnel are coordinating efforts with regional volunteers, continuing work around the village. Two type-2 crews are to be mobilized to the fire during the next shift to help with suppression efforts.

Even with diminished winds, the fire became active in the NE & S corner. Active fire spread required aerial resources to control spread. Resistance to control and extinguishment are extreme due to drought conditions. Some moderation in fire activity is possible as conditions moderate, however dry fuels, high fuel indices, and significant mop up needs to secure containment lines will continue to provide a threat to containment if another wind event materializes.
