Jackpots of fuels on the interior of the fire and adjacent to structures are causing flare-ups that reduce the amount of time resources can use to respond and secure the fires perimeter. As the amount of trees that continue to fall increases, the amount of attention the resulting jackpots of fuels require from suppression resources will increase. Resistance to control and extinguishment are extreme due to drought conditions. Resources will continue to pursue containment of the incident and protect values at risk. Control lines will be secured by hand crews with adequate supplies of water for extinguishment.

Fire continued spread south of the Sterling Highway and across Skilak road today. Traffic was delayed due to smoke on the Sterling Highway today. Fire resources have begun burnout operations south of the highway to help reduce future impacts to the roadway. Resources are evaluation and prepping structures and will continue to secure fire edges in an effort to prevent fire spread towards Cooper Landing and Sterling. Resources used dozers and crews to establish and secure lines between Sterling Highway and Skilak road. Utilizing shuttle boats, crews continued securing the fire edge south of Sterling Highway.

12 hours: Very active fire behavior across the fire until temperatures drop and relative humidity rises. Rapid fire spread is possible between Sterling and Skilak roads as well as in the Resurrection Trail area.

24 hours: Fire activity in the Hideout Mountain, Hidden Lake, Juneau Lake, Bear Mountain, Fuller Lake, Trout Lake, Juneau Creek, Kenai River corridor and Sterling Highway areas will continue.

Torching, active ground fire, and short crown runs will drive spread with available fuels, aspect and slope.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
