1AT discovered the incident during a detection flight sizing the fire at 0.1 acres, plotting in Full. H-169 responded and sized up the fire as 1 acre with very active fire behavior in spruce and mixed hardwoods and 35 mph winds, ordering Fairbanks-72, Fairbanks #1 crew, air attack, and two fire bosses. H169 and fire bosses knocked down it significantly, Fairbanks #1 was flown into the fire and engaged in suppression, and fire is currently maintained at 1 acre. Aircraft were released and command was transferred to Fairbanks #1 at 22:13. Fairbanks #1 and F-72 as staging manager will remain on the fire overnight and H169 will return in the morning to complete supply sling operations.

The fire was reported to be 400 acres burning in black spruce, mixed hardwoods, and tundra. AA-0AX and BD905 provided aerial supervision while Tankers 544 and 542 conducted retardant drops. Retardant proved to be effective on the anchor and the heel of the fire. Firebosses 247/246 and Scoopers 286/285 conducted water drops. Due to weather conditions, fire growth, and lack of aerial resources the initial strategy was changed from full suppression to point protection. A type 2 crew was mobilized and resources are assessing structures, reducing fuels, and implementing hose lays.

Residents along the Elliott Highway were asked to evacuate on June 26 as the Globe Fire rapidly approached between mileposts 41 and 43. The GO order to evacuate was extended to milepost 39-48 the morning of June 27, due to the increase in fire activity as the fire pushes closer to the Elliott Highway. The Elliott Highway has been closed from milepost 28 to 48. Smokejumpers worked on point protection of Globe Creek Campground clearing away burnable fuels and installing water application systems. Smoke from the fire produced remarkably poor visibility in the air and on roadways, limiting ability of responding aircraft and slowing progress of ground resources. Smokejumpers reached out to residents who were sheltered in place to ensure their safety. Incident personnel will continue to monitor safety of residence who are sheltered in place. Incident personnel will monitor safety of residents while continuing to conduct point protection of structures, critical infrastructure, and highway transportation system.

Observed fire behavior was active with running, torching, and spotting in black spruce. Incident personnel conducted a reconnaissance flight to assess perimeter and structural protection needs. Personnel continued to remove suppression materials off the line to transition to their point protection strategy. They assessed 2 structures on the south side of the fire and determined that only a small amount of effort will be necessary to prepare structures for fire protection. Personnel will continue to assess structural protection needs to determine supplies required to achieve objectives. Crews will work to remove burnable fuels and install water application systems around the 2 structures south of the fire.

As of this morning this fire has consumed fire 204.

Fire behavior was quite active today. Flanking, backing, and group torching were observed on the northern and southern ends of the fire today, most actively burning in black spruce. Crews continued securing the fire edge and completed indirect line construction on the south side of the fire to reduce the threat to structures. A module and two engines patrolled the Richardson Highway and adjacent communities. Acres total for 204, 205 and 119 = 107,391.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
