Narrative from 8/29/2026: Work is continuing in Divisions Alpha and Whiskey, where the majority of resources remain focused on mopping up and mitigating hazards around structures to support safe repopulation of evacuated structures as well as mitigating hazard trees to keep access routes clear. As of today, Saturday, 8/29, at 0600, the remaining evacuation zone has been lifted, allowing full repopulation of the community. The temporary flight restriction remains in place but will shrink in extent Sunday, 8/30. A Utility Group has been established to coordinate with partner utility companies on repairing fire-damaged infrastructure and safely restoring electricity to the community. Power is being restored to affected areas in a safe manner. The Alaska State SEOC continues coordinating with multiple entities to identify, mitigate, and remove potential hazardous materials from residential areas. Moderating weather conditions and fire behavior are representative of the shift in focus on the incident from containment to repair, with overnight temperatures forecast to fall into the 30s and winter weather approaching, efforts remain focused on completing this work ahead of the onset of snowfall.

AKCIMT will transfer command to a Type 3 team, with a shadow day Monday, 8/31, and transfer of command on Tuesday, 9/1.
