Narrative from 10/27/2026: Tok Prevention received a phone call reporting a burning tree in the powerline at mile post 1313 of the Alaska Highway, directly across from the Tok Transportation Bus Barn. Due to the time of year (late October) Tok Forestry did not have an operation engine available so Mutual Aid with the Tok VFD was established. P-47 responded with Tok VFD Chief-1 truck and found a single tree burning at the base extending 10 ft around the tree. The tree was not on a powerline as reported. AP&T was notified and arrived on scene. After suppression action was taken, AP&T cut down the tree to prevent it from falling into the powerline due to a compromised root system from the fire. The incident was declared contained, controlled and in monitor status.
