Fire personnel continued to provide site protection around the town of Red Devil. At 1845 it was determined that action needed to take place on two active spots. T-55, T-52, and LP-0AK all responded from Palmer. Due to bad weather T-52 was unable to take action, but T-55 was able to drop two loads of retardant. Due to the fire receiving light rain last night, crews were able to implement a direct attack strategy that will continue to be the strategy from here on out.

The IC and Operations met with the community of Aniak to discuss future plans, and listen to their concerns. The biggest concern was multiple structures across the river from the town, that are in a direct path with the fire. Plans for tomorrow will consist of continuing to prep the town of Aniak, as well as fly to the structures across the river and start plumbing those for protection. A recon flight happened this morning and it was reported that the fire was moderately active today, but made significant growth yesterday evening.

Continued use of aerial and ground resources to protect the threatened towns of Nulato, Koyukuk and structures along the Yukon River. Firefighters will work to keep the fire west of the Koyukuk River and north of the Yukon River. The fire perimeter is 100% active with isolated group torching. Firefighters continue constructing hose lay, saw line, fuel breaks, and will possibly be burning out if necessary. Firefighters will attack and mop-up all spot fires within the outskirts of Nulato. Due to the threatened status of the village of Koyukuk firefighters anticipate constructing a saw line and hose lay in a natural slough barrier southwest of Koyukuk.

4MN flew a recon over the fire and observed the fire perimeter 60% active, smoldering, creeping, backing and torching. The fire has steadily burned to the east and is approximately 2.75 miles from the Tripod Flats Cabin and is roughly 30,000 acres. There is no threat to the Old Woman cabin and shelter at this time with no smoke showing on the western perimeter of the fire. Structure protection remains in place on all three cabins. Burn out operation plans have been established and will be implemented if necessary.

Crews in all divisions continued their work today as they have and continue making headway in mop up, gridding, patrolling and securing all control lines. The forecast for tomorrow is for a 35% chance of wetting rain and this will result in minimal fire behavior and will again give firefighters a good opportunity to gain ground on mop up. With the weather predicted to be the same for the next few days crews will be able to tie the control lines together and continue mopping up and securing all control lines. Mop up and patrolling around the structures continues Structure protection continues with the complexities of the Wildland Urban Interface. Crew began pulling hose and equipment off the line today and that will be the plan for the next few days. Rehab has begun on the dozer lines and other areas of the fire. The fire size remains 8876 acres.

The fire was flown by detection aircraft 1010F. The fire was reported to be at 80 acres, 6.1 miles north of the village of Medfra. The fire had spread up the hill to the ridge top, and the north flank was smouldering. The fire was putting up smoke but also taking some rain. There is also a large mining encampment three miles due north west of the fire. The fire had hit a ridge and laid down, it was not moving in the direction of the mining camp. Due to limited resources and higher priority fires no further action was taken. The fire will continue to be monitored.
