The observed fire behavior was minimal with creeping and smoldering due to higher humidity. Fire continued to spread to the north along the Koyukukat at Long Bend moving towards Fish Creek, and on the SE portion along Indian Creek. Plans are to provide point protection for Hughes and adjacent values at risk along the Koyukuk River corridor and monitor fire spread and activity on the Isahultila #479 fire. Allotment protection north of Hughes has increased the need for river travel and personnel. Smokejumpers will prep the Utopia site and provide river logistics with a zodiac and operator. This fire is part of the "Hughes Fires" and will be managed and monitored along with fire #471.

Warm weather, low RH, and a Northern wind challenged the active fire line on the Southern perimeter, resulting in the fire spotting across Bogus Creek. Crews worked the spot with bucket support from Helicopter 212HL, and caught it at 1.4 acres. T-52 and BD-840 were requested from Palmer, and T-52 dropped a single load of water on the North side of the creek to prevent further spotting. Lower Kalskag crew held the Western edge of the fire throughout the day, and towards the evening they moved two miles north to suppress a one acre area of heat along the perimeter that crept out of a dormant peat bog. The fire also became active on the Northwest corner but the Northern wind prevented it from advancing. Plans for today, 8/4, consist of fire personnel holding and improving active portions of the line. A recon of the Northwest corner is planned to determine what type of action will be needed in that area.
