

AICC Situation Report

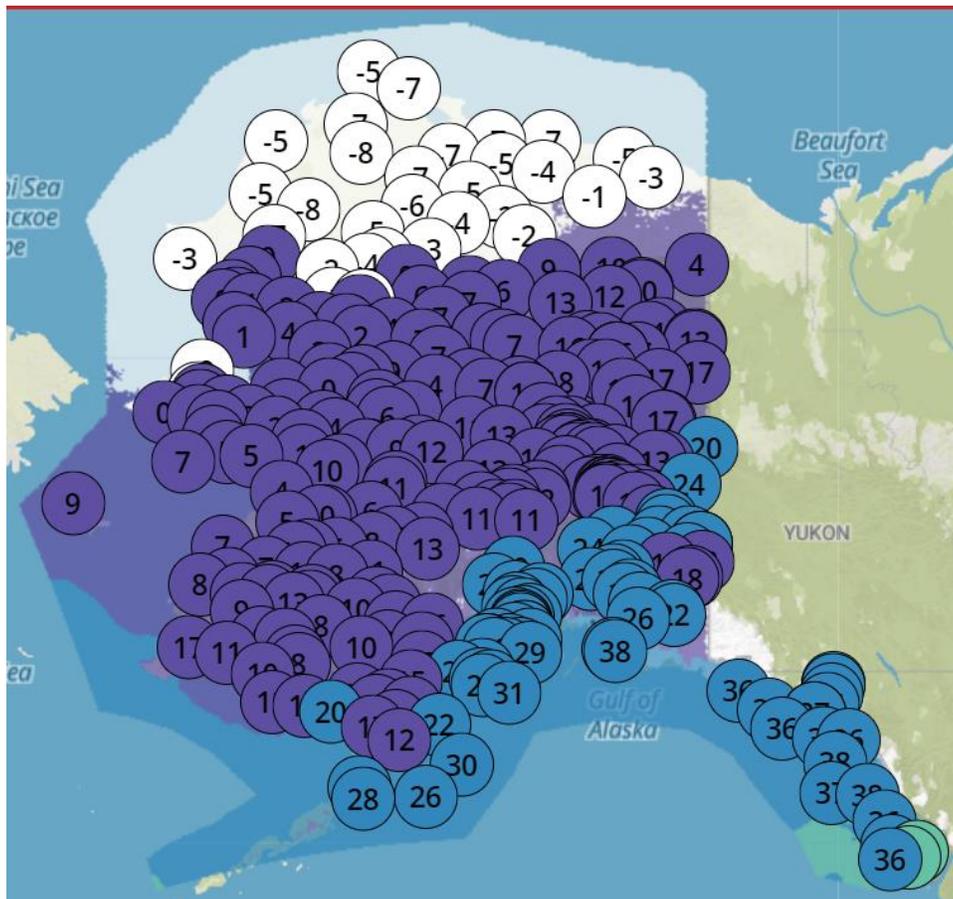

April 1, 2021

As of today we have no fires to report this season. Alaska seems to be having a late start by the standard of the last 10 years.

In the decade 2001-2010 there were fires in March in only 3 of the 10 years.

In the decade 2011-2020 March fires occurred in 9 out of 10 years.

(Predicted temperatures for 1400 on April 1.)

It is true, temperature is not everything in fire.
