Wednesday was a hot, dry and breezy day. Thursday will be as hot, even drier, and windier. The upper level flow is out of the south and crossing the Alaska Range. This has caused drying and will continue to generate low level strong, gusty winds. With forecasted weather and fuel conditions minimal growth is expected. With IA responsibility and hazard fuels adjacent to fire, potential torching, spotting and active crown fire with forecasted warming and windier weather spawning Red Flag Warnings in adjacent forecast zones.
