Increasing but minimal fire behavior across most of the fire today. Significant interior smoke observed with the highest concentration on the eastern portion that burned the hottest on Tuesday evening when the fire made a significant run. While the fire has burned into Upper Yukon Zone, it remains on Alaska State land. An area on the west flank was also showing significant light smoke in the area of Sunday's retardant drop. One Type 2IA crew was dispatched to a new start in Fairbanks. That fire was contained and the crew returned to the incident. Updated size: 43,476.

Weather was overcast, with light rain to the north, and calm to light winds out of the south. Fire personnel conducted a reconnaissance mission in the afternoon by helicopter. Fire activity was mostly quiet, except at the northeast corner of the fire area near the mouth of the Charlie River where there was some isolated torching, active flanking, and a smoke column. Total active perimeter was about 10-15 percent. The National Park Service module made improvements to cabin and dredge site protections and egresses, and plan to install more hose tomorrow. Firefighters will also continue to monitor the fire and assess protection for potential values at risk.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
