Weather was clear, with light winds out of the south, switching to the south-southeast in the early evening, and generally hotter and drier than predicted. Fire personnel conducted several helicopter reconnaissance missions in the afternoon and evening. Fire activity has increased considerably, with short range spotting and flanking in white spruce, but is not expected to reach the closest cabin site due to a hardwood stand and old burned area in between. Firefighters will continue to protect cabin and RAWS sites with sprinklers and backpack pumps, while also assessing any other needs for protecting potential values at risk.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
