6PA flew fire with helitack load to look at smokes near the point protection sites around Jatahmund Lake. No point protection sites are threatened on Jatahmund Lake. Other point protection sites to the south and west of the fire are not threatened due to weather and low fire activity. Fire activity was minimal with smoldering and creeping in interior pockets. Only 5% of the fire edge had any visible smokes. Lots of jack strawed trees caused by deep burning and high winds are still producing smokes. Perimeter showed minimal growth. No new maps produced. Fire placed in monitor status.
