Structure protection and indirect lines to protect St. Marys continue.

Strong north and northeast winds continue to drive the fire rapidly towards values at risk. Very low relative humidity continues, and combined with very dry and fire receptive fuels is causing rapid fire spread. This weather pattern will continue for at least the next 72 hours

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
