PDPN6K Owner: **USFWS** Unit: **AKYDR-Yukon Delta National Wildlife Refuge**
160 Name: **East Fork** Cause: **Lightning**

Fire activity includes backing, isolated torching, and short runs. Fire progression to the south has moderated with cooler temperatures and west winds bringing in coastal moisture.

Moderated temperatures and a wind shift from the north to the west has greatly decreased fire behavior over a large portion of the fire. Direct attack is becoming an option on the west flank.

Heavier fuels on the east flank may be more difficult to extinguish. A pre-existing fireline is being improved to protect the community of Pilot Station.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
