Continue preparing the indirect fireline protecting St. Marys, Pitka's Landing, Mountain Village, and numerous Allotments. Lack of available vehicles (trucks, UTVs) is hindering current efforts in this area. If burning becomes necessary incoming crews will be needed to support a potential burning operation that could extend over 20 miles.

Moderated temperatures and wind shift from the west/southwest has greatly decreased fire behavior over a large portion of the fire. Direct attack on the western flank continues with support from firebosses. UAS aerial ignition between the north fork and east forks of Andreavsky River are progressing well. A pre-existing fuel break is being improved to protect the community of Pilot Station. 2 additional type one crews arrived at Pilot Station.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
