899 Name: **Lime Complex** Cause: **Human**

Alaska Black IMT2 (IC Sanford). Today marked the last day of relief from the cooler and more mild weather. Tuesday will see breezy northwest winds of 10-15 across the planning area. The rest of the week will feature a warming and drying trend. Fire activity increased slightly today and has the potential to increase the rest of the week. Approximately 94 fire line resources are assigned to the complex including {2} Type 1 hand crews (Pioneer Peak and Winema) and various overhead. {1} Type 2IA hand crew (Gannett Glacier) was assigned to the complex today. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance. Aniak staging is in place to support current and future resources assigned to the complex.

Total acres reported for the 18 fires is 450,470

188 Hook Creek
189 Nushagak River
190 South Lime Lake / 228 Swift River*
197 Gagarhah River / 198 Stony River*

PDPN6K Owner: **USFWS** Unit: **AKYDR-Yukon Delta National Wildlife Refuge**
160 Name: **East Fork** Cause: **Lightning**

Fire activity is much reduced with multiple days of moderate RH and some rain over the past few days.

There are several areas of the fire smoldering, some of it along or near the fire's edge. Movement of surface fire in light fuels is likely.

Primary and secondary indirect lines are in place and plumbed around the communities of St Mary's, Pitkas Point, and Mountain Village. If necessary they can be activated on short notice. The eastern flank of the fire that has crossed east of the East Fork has been contained in order to provide protection for Pilot Station and allotments to the east.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
