Alaska Black IMT2 (IC Sanford). Fires 205 and 239/240 had active surface fire within the black spruce and tundra with torching and short-range spotting. The fire had up to 4 miles of growth to the Southeast by the end of the burn period. Approximately 121 fire line resources are assigned to the complex including {2} Type 1 hand crews (Pioneer Peak and Winema) and various overhead. {1} Type 2IA hand crew (Gannett Glacier) is also assigned to the complex. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Unawweep conducted a successful burnout operation to address point protection concerns spotted by aerial reconnaissance at Pebble mine. Fires are being assessed daily by aerial surveillance or satellite imagery or ground reconnaissance. Aniak staging is in place to support current and future resources assigned to the complex. Plans for a small staging area out of Illiamna to support fires 239/240 and 205.
