Weather over the fire on 6/30 was sunny with no precipitation with winds out of the SW, 3-5 miles per hour. There was significant fire growth during this operational period and personnel at the allotment could see flames that were crowning and running about two miles from the allotment. Personnel worked on prepping the Belle Lake allotment and the West Flank where hose lay was put in for firing operations. They prepped two structures that were within the allotment and laid sprinklers and hose down for structure protection. The fire is estimated at 500 acres.

AFS Aerial support and Helitack worked the incident until the smoke caused poor visibility on the incident. Ground crews worked the incident directly and continued structure protection. A type 2 team remains running operations for this incident and coordinating evacuation efforts.

Increase in temperatures has allowed for increase in fire behavior. Fuel conditions continue to support active fire behavior at the head of the fire with group tree torching and moderate rates of spread.

Hardwood areas are allowing surface fire spread with creeping, flanking, backing and smoldering.
