#046 Name: **North Eielson** Cause: Human

The fire transitioned at 10:02 from a Type III incident to a Type IV incident. Due to more accurate mapping, the acreage has decreased to 117 acres. Crews worked to move pumps and miles of hoselay today. They also put up a sprinkler system over a very large ashpit which is too dangerous to work directly. Crews found 3 large hotspots in the berms and worked with the Excavator to fully extinguish them. Containment is anticipated by the end of shift.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
