Today, crews continued to hold sections of line where firing operations were previously conducted. Options for firing operations on the east side of the fire which would connect past firing operations into the Delta River were assessed. On the west side of the fire in vicinity of military observation sites area, crews prepared sites for point protection and assessed options for safe firing operations in that area. Potential UXO concerns outside of identified military impact areas have limited current operations to established road and trail networks while these concerns are investigated further by military personnel later this evening. Suppression repair operations were concluded and the heavy equipment on the fire is being demobilized.

The IMT is preparing for a transfer of command to the NW 11 IMT2 on 5/21/19.
