Firing operations continued today to gradually back the fire to the indirect control lines in the vicinity of Chalkyitsik. Hand-lighting operations on the indirect line between the Black River and Chahalie Lake were completed protecting allotments and structures in that area. Point protection measures were taken on 4 structure sites in the Black River corridor as the Bearnose Hill and Frozen Calf fires simultaneously advanced into the river corridor from opposite directions. Firing operations were conducted at two of the sites and "pump-and-run" tactics were used to protect the other two of these sites due to the danger the extreme fire behavior posed to firefighters as the fire ran directly at those locations. Point protection continued on additional sites further upstream on the Black River and on sites in the Little Black corridor. Complex Total Acres - 414899

181 Name: **Swan Lake** Cause: **Lightning**

Fire behavior today was low to moderate. The northeast flank received precipitation yesterday which slowed fire spread. In areas where no precipitation fell the fire continued to spread in the Thurman and Mystery Creek drainages with surface spread and occasional torching.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
