Significant precipitation occurred over the fire area today, minimizing fire behavior. Creeping and smoldering continued, particularly on the southern and northwest portions of the fire. Direct lines were extended and reinforced on Division Alpha and mop up occurred on Division Zulu. Heavy rain early in the shift made crew transport by helicopter impossible. The fire is transitioning to a Type 4 Incident at the end of this operational period and will be managed by the local office.

No significant fire growth observed during today's operational shift. Demobilization of resources continues. Further repair plans are being assessed. With continued hot and dry weather fire behavior has increased inside the fire perimeter. All containment lines continue to hold. Plans for tomorrow's shift will include further demobilization of resources, repair work assessment, and monitoring fire behavior.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
