Crews continued building and securing fireline today. Additional resources will arrive tomorrow to begin mop up and aid in securing the fire edge.

Predicted Weather: North to northwinds will prevail again today with overall similar conditions as Friday. The northerly flow will once again aid in transporting the smoke plume back towards the south-southeast with some improvements to visibility along the western flanks of the fire. Temperatures look to remain above seasonal averages. Only very slight chances for a stray shower are expected through the weekend with little to no wetting rains expected.

The north half of the fire has been gridded and is considered to be mopped up about 30 feet in. Progress is slower in the south half due to near impenetrable brush. Two excavators are arriving on the evening of 08.23.19 and associated overhead should arrive early on 08.24.19. These resources will help increase production in the southern half of the fire. Snags are a constant concern in the timbered areas of the fire.
