The fire was reported by a private citizen as a small, smoldering, unattended fire. One Forestry engine and Prevention responded and found an abandoned campfire that had burned into the root systems of two trees. The landowner had constructed a dozer line around the fire and Forestry personnel mopped up the fire and put water on it. The fire was contained and controlled and will be checked during the next operational period.

Perimeter control and interior containment has reduced the potential for fire spread.

Extremely dry duff has burned away leaving large ash pits and very unstable trees in the fire area. The ash pits are impeding mop up operations due to their depth and the hazard they pose to firefighting personnel. The unstable trees are impeding mop-up operations and also pose a hazard to firefighting personnel. Trees, green and fire-weakened, are falling without significant wind, creating jackpots of fuel. These jackpots are falling on hot ash and flare up, torching out nearby trees. This torching supplies embers for potential spots outside of existing fire line and could threaten structures that were saved during initial firefighting efforts.

Resources continue to pursue containment of the incident and secure around structures to protect values at risk. Despite lack of fire spread, control of the fire will take extensive mop up and water from crews and equipment. Current staffing in the Divisions will continue. Weather forecasts currently show no signs of normal climatological conditions to the area, instead predicting continued dry atmospheric conditions. Crews will continue to work with the Matanuska Electric Association working within the utility corridor reducing hazards in order to restore power to the remaining properties. The Incident Management Team will also be focusing efforts on making the access and area safer for firefighters working in the area and the residents whom have returned to the area.

Continued securing fire lines along the southwest and southeast portions of the fire to stop spread to the west toward Sterling and the east toward Cooper Landing. Hand crews resumed constructing and securing fire lines south of the Kenai River into the Kenai Wilderness near Cooper Landing. Resources continued constructing and holding line along the Fuller Lake Trail to control spread to the southeast towards Cooper Landing. Structure groups worked with local resources to complete contingency lines and other structure protection actions within and adjacent to Cooper Landing. Resources continue to assist conducting damage assessments.

Predicted Weather: 24 hr: Rain showers continue Saturday morning with breezy southeast winds expected. Wetting rains are possible with decreasing rain chances in the afternoon.

48-72 hr: A strong low pressure system will approach the burn site with strong and gusty southeast winds expected across the burn site. Localized gustier conditions are expected through NW-SE aligned canyon terrain. Increased chances for rainfall and wetting rains are expected through the day Sunday into Monday.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
