Surface fuels and duff are continuing to dry contributing to difficulty in mop up. The potential for fire spread is increasing due to leaf drop within the fire perimeter. Extremely dry duff continues to burn creating large ash pits and unstable trees in the fire area that is hampering mop-up operations. Trees, both green and fire-weakened, are falling without significant wind, creating jackpots of fuel on existing hot spots. Crews and equipment will continue to secure around roadways and structures in the Yancy subdivision at the north end of the fire. Much of the fire's east flank is in patrol and monitor status, although crews will continue to grid in some areas. Crews and equipment will continue to work around structures in the Parks Highway corridor. Heat in utility right of way berms will continue to be exposed and mopped up. Water handling equipment will be backhauled where it is no longer needed and suppression repair will be conducted in select areas.

All of Division A and the north half of Division Z is in patrol status. A portion of line between Medford spike and TCC spike has not quite met the mop up objectives yet, however by the end of the next operational period it should be in patrol status as well. Division L/Red Shirt Lake will be unstaffed.

Resources continue to work confining and suppressing the fire on the southwest, south and east sides of the fire. The northern portions of the fire are being managed under a confine strategy, using natural breaks with suppression action in targeted areas as needed. Point protection strategies are being employed, as necessary, to protect cabins and other values at risk.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
