Areas of the fire were warmer and dryer today as crews on the southern and western edges of the fire continued securing control lines. Control lines have held along the Dalton Highway, Trans-Alaska Pipeline and Hovercraft Road. Crews along the Yukon River continued to assess values at risk. The northern edge of the fire has burned to and held on the Yukon River. The eastern and south eastern edge of the fire remains active and fire behavior increased in the afternoon, resulting from an increase in wind speeds. Air resources will continue to slow fire spread to the east and southeast edges of the fire tomorrow and allow crews to construct line north to the Yukon River. Northeast winds as well as thunderstorms and lightning are predicted over the fire area tomorrow increasing the chance of new starts and erratic winds.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
