Observed weather today: Temperatures were cooler and humidities were wetter under the influence of showers that moved quite close to the fire. Active thunderstorms with hail and wetting rains brushed by the fire to the south with approximately 20 lightning strikes within 10 miles. Outflow winds were only around 10 to 20 mph. Isom Creek will remain under a persistent weather pattern that will still cause convection in the afternoons and evenings, but due to the moistening of the air mass will be a little cooler and wetter on Monday.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
