A fire was reported on the Aniak River by the owner of a remote lodge. Reporting party relayed from personnel in the field that the fire was burning towards the lodge and their hoses were unable to reach the flames. H-374PA responded from McGrath as well as Air Attack-5AK and Tanker-53 from Palmer. J-66 also responded from Galena, shortly followed by Scoopers 260 & 263. Prior to arrival of resources reporting party confirmed structure involvement but lodge personnel were out of harm's way in their boats. Helitack was deployed on the fire as well as 8 smoke jumpers, working with aerial resources to contain the fire. IC estimates the loss of five structures on the property and will confirm with further assessment. Personnel report the fire will be 60 percent contained at the end of shift and have requested additional personnel to complete containment and assist with heavy mop up.

Rogue River with first load of jumpers will continue going direct on original fire footprint, focusing on the left flank and lower 1/3 of the fire. Jumpers will work the slop-over across the slough, focusing on the left flank and top 1/3 of fire. Utilize aviation resources as needed to connect line, (Fire bosses and H-580).

Tie in the left flank of the fire by end of shift and begin mop-up lining of right flank. Mop-up of left flank, continue lining the right flank. Continue to grid green and check known spot fires. Utilize aviation resources as needed to work towards containment. With multiple spot fires and jagged edge of fire, an IR flight or UAS module is a must. Two Type 1 crews (on order) for Thursday/Friday time frame. Incident will take multiple days to secure lines and spot fires. As fresh crews are inserted this will aid in the release of some jumpers back Fairbanks. Incident has lots of mop-up ahead that may take a week.

The fire has received precipitation today again with cooler temperatures and humidities. Crews continue to mop up along the Dalton Highway, Trans-Alaska Pipeline, western and southern flanks, Hovercraft Road. Crews along the Yukon River continued to assess values at risk. The eastern edge of the fire remains uncontrolled and crews are establishing primarily indirect handline. Air resources will continue to slow fire spread to the east and southeast edges of the fire allowing crews to construct indirect line to the Yukon River if needed. Moderated weather is predicted for the next couple days with chance of isolated thunderstorms and lightning over the fire area increasing the chance of new starts and erratic winds.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
