Crews continued to reduce fuel loading on fire's edge and opened canopy to allow for adequate penetration of moisture.

Precipitation has aided suppression efforts significantly and the fire will transition to a Type 4 complexity end of shift 6/23.

Observed weather today: It was a cool and very moist day today on the fire. Cells stayed well to the South and the skycover was broken or overcast. Dense fog along the Dalton Highway on the fire perimeter disrupted traffic, but simultaneously there were gusts to 18 mph at the Seven Mile RAWS. Temperatures were in the mids 60s with RH values 70 to 80%. The weather will be nearly the same on Sunday. Look for very slight daytime drying, but also a pretty good chance for wetting rain Sunday night.

Continue to mop up, patrol, and secure the southern and western edges along the Dalton Highway, Trans-Alaska Pipeline and Hovercraft Road. Fire has received precipitation over the past 24 hours, fuels are not available for burnout. Evaluate options for direct line or hot-spotting tactics on the eastern edge.

Some crews will continue to spike out in the field to minimize travel times for work on the eastern flank.

A Type 3 organization will shadow the Black Team and prepare for a 0700 Monday 6/22 transfer of command. The Suppression Repair Plan will be ready for approval.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
