VIIRS were detected in the vicinity of Akiachak. AFMO was notified, then began to contact local resources for more information. A local party reported the fire to be burning structures and escaping into the wildlands. J-90 was deployed and responded to the incident, deploying 12 jumpers. The IC reported the fire to be 60 acres in size, 40% active, creeping and running in spruce, grass, and tundra. IC also reported that one structure had been burned over. One load of smoke jumpers, two heavy air tankers, two fire bosses, air attack, and a helicopter with a bucket responded. IC used the air resources to secure a structure to the west of the fire, that was in immediate danger. IC was able to get control of the head of the fire by using air resources on left and right flanks. IC ensured a landing zone was cut out to support medivack needs, if necessary. The IC plans on using a Type 2IA Crew to secure the fire's edge and begin mopping up during next operational shift. Fire has grown to more than 160 acres at the last report.

Pioneer Peak was mobilized to the fire. The plan is to continue to secure lines on the Southern perimeter to protect infrastructure and secure lines, minimizing smoke impact to the local airport and aviation. Type-2 helicopter will arrive at the fire tomorrow to assist in protection efforts. J-17 will demobilize 8 smokejumpers from the fire early in the morning during the next shift and personnel will work to construct indirect line on the East perimeter to the West.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
