388 Name: **Discovery Creek** Cause: **Lightning**

Fire behavior was smoldering, and no areas were cause for concern. Drone operations were conducted to assess areas of the fire that could be included in prescribed fire operations. Smokejumpers and the Nanook T2 crew worked the southwest edge of the fire and will continue to work that section for the next two days. They will move to the northwest corner of the allotment after they complete their current objectives.

386 Name: **Marten Creek** Cause: **Lightning**

North Star crew continued to improve the indirect fuel break in Venetie between the dump and the new runway. The White Mountain T2IA arrived at Venetie today and assisted North Star crew with the indirect fuel break. A saw team from the crew was used to create and improve a helispot adjacent to the fire in anticipation for inserting crews on the fire perimeter for direct attack tomorrow. These direct attack operations will contain the south and southwest flanks of the fire in order to check the fires spread towards Venetie and nearby cabins. Fire Bosses were utilized to moderate fire behavior where the crew is planning to go direct on the fire tomorrow.
