Tok Forestry Helicopter 6PA spotted a second fire en route to fire 423. After giving a size up smokejumpers were ordered. Five smoke jumpers jumped the fire and report it at about an acre and smoldering. They will work on cutting line and securing the fire during next operational shift before planning to turn it over to the local unit.

Smokejumpers continued working their fire break towards the southwest corner of the allotment while the Nanook crew started mop up operations and pulling hose line off of the fire. Weather over the fire was cooler with winds 5-8 mph out of the southwest, gusting to 15mph. Due to forecasted heavy rain and cloud cover, the demobilization of the Nanooks was scheduled to take place by end of shift on Saturday.

White Mountain T2IA and TCC T2IA crews continued to contain the fires edge anchored on a lake at the southeast corner of the fire using saw line and hose lays. The crews tied in their lines so that the fire perimeter is now contained between H-30 and H-37 which is approximately 80 % of the fire perimeter they are planning to complete on the south flank of the fire. White Mountain crew began working west from H-37 around the southwest corner of the fire and then back to the north. TCC crew additionally began securing a few green fingers that were initially bypassed with indirect line and pulled excess hose and pumps for backhaul.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
