CES toned an electrical hazard near the intersection of Interlake and Grouse. K-66 and K-70 responded. IC reported a 4x2 fire with two other spots. By the time the powerline was de-energized, the spots had grown to 3x20, 1x1 and 2x2. K-70 and K-66 suppressed flames and IC called the fires contained and controlled.

CES toned an electrical hazard. K-66 and K-70 responded and found a tree on a powerline. There initially appeared to be no involvement, as there were no flames or smoke but a few char markings were found on the tree once it was safely on the ground. The IC declared the fire out.

Daily Report From: 08/04
Daily Report From: 07/31
Daily Report From: 08/03

Part of the Lime Complex
Part of the Paradise Complex
Part of the Bean Complex
Noticeably cooler temperatures, and light rain over the fire area helped to moderate the fire spread potential. The smokejumpers have reported moderate fire behavior. They continue to work on the North and South flanks, cutting through thick spruce and brush, to protect allotments and secure the fire edge.

Grating operations were continued for 8/7. No new fire growth.
These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
