Kotzebue Flight Service received a pilot report of a wildfire, estimated 100 acres in size, burning approximately 20 miles northeast of Noatak, on the south side of the river. Local air attack platform sent to recon the fire and assess the area for any values at risk. Upon arrival, air attack estimated fire size at 350 acres burning in open and flat tundra. Fire appeared to be wind driven and burning predominately to the north. Local air attack identified several natural barriers to the fire's progression, but nothing continuous, and stated due to overcast sky conditions and current weather would be difficult to take action (jump the fire) on the incident.

No notable fire growth observed, with fire behavior, creeping and smoldering. Personnel created more defensible space around structures, and were the recipients of a proficiency drop by a State of Alaska airtanker. In the next operational period, crews will continue to implement structure protection plans.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.

At time of recon estimated size of fire at 1500 acres, 60% active, with winds out of the south. Fire appeared to be aggressively backing into the wind but had not burned out of Limited into Modified. Air attack identified an old mining camp 10-12 miles north of the fire, sited on a tailings pile and well protected, but did not discover any additional structures. Air Attack took photos of the allotment to the south of the fire for intel.
