Fire behavior was active today, particularly in stands of continuous black spruce. Smoke moderated behavior around 1500. IHCs continued securing line by bonepiling, gridding, and mopping up heat in the 5 Mile cabin group to reduce the threat to structures. Eastern Montana T2IA crew was inserted today to replace Midnight Sun IHC. A module served as lookouts and secured the Rail Road Bridge. Two engines patrolled the highway corridor, monitored highway for smoke impacts, and served as a point of contact for the public.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
