The fire has received moderated weather today again with cooler temperatures and humidities. Crews continue to mop up along the Dalton Highway, Trans-Alaska Pipeline and Hovercraft Road. Crews along the Yukon River continued to assess values at risk. The eastern edge of the fire remains uncontrolled and crews are establishing primarily indirect handline. Air resources will continue to slow fire spread to the east and southeast edges of the fire allowing crews to construct indirect line to the Yukon River. Crews will continue to secure fire edges along the western and southern flanks. Thunderstorms and lightning are predicted over the fire area tomorrow increasing the chance of new starts and erratic winds. The fire area will remain under a persistent weather pattern with potential thunderstorms.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
