The southern and western edges of the fire are contained along the Dalton Highway, Trans-Alaska Pipeline and the Hovercraft Road to the Yukon River. The northern edge of the fire is contained by the Yukon River. Native Allotments and structures on the river corridor are secured and mopped up. Although fire activity has decreased due to moving into an area burned by a previous fire, increased humidity and precipitation, the eastern edge of the fire continues to have long-term potential for spread if fuels dry later in the season. Hotspotting and monitoring strategy continued to be implemented. Crews will utilize UAS operations to identify hotspots along the Yukon River and continue hot-spotting tactics. Firefighters will begin the construction of approximately 0.8 miles of direct line to tie in an area of old burn. Crews continue wildland fire suppression rehabilitation work, as necessary.

These fires are currently in monitor status. Monitoring schedules are based on defined timeframes, but are dependent on available resources, and weather conditions. When monitoring occurs, information will be updated.
