899	Name:	Lime Compl	ex			Cause:	Human	

Approximately 80 fire line resources are assigned to the complex including {1} Type 2IA hand crew (Gannett Glacier) and various overhead. These resources continue to identify and validate known sites that require defensive action and initiate structure protection measures, as needed. Fires are being assessed daily by aerial surveillance, satellite imagery and ground reconnaissance.

Total acreage reported for the 18 fires is 782,468 acres

Fire was fairly active today and was spreading in the direction of the repeater. A retardant drop by the air tanker directly on the line will slow its spread until further actions can be taken.
